SUMMARY

Full Stack Developer with 3+ years of experience building production web applications, backend services, and API-driven platforms. Strong hands-on experience with React/Next.js on the frontend and Node.js, NestJS, Express, MongoDB, and Redis on the backend, with additional exposure to Spring Boot, Kubernetes, microservices, and service-oriented architecture. Experienced in REST API design and integration, real-time systems, API governance, server-side analytics, privacy controls, and multi-application platforms, with a focus on reliable end-to-end delivery.

SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Java, Python, SQL, HTML, CSS
- **Backend & APIs:** Node.js, NestJS, Express, Spring Boot, REST API Design & Integration, API Gateway, Microservices, MongoDB, Redis, Socket.IO
- **Frontend:** React 18/19, Next.js (App Router, SSR/ISR), Redux Toolkit & RTK Query, MUI, Vite, Module Federation, MDX, i18next, Recharts, Tailwind CSS
- **Architecture & DevOps:** Kubernetes, Microservice Architecture, Multi-repo Systems, GitHub App Integrations, Real-time Services
- **Leadership & Soft Skills:** Team Leadership, Analytical & Problem-Solving, Communication & Presentation, Cross-functional Collaboration, Adaptability

EXPERIENCE

Full Stack Developer

November 2023 – Present

Sense & Respond Software LLC · USA

- Build full-stack features across React/Next.js applications and Node.js/NestJS/Express backend services, owning data flow from service and API layers through to production UI.
- Work across a multi-repo architecture spanning a Next.js reader, React admin SPA, Express API, AI gateway, and supporting services, defining and consuming REST contracts across service boundaries.
- Contribute to backend services using NestJS/Express, MongoDB, and Redis, including data models, business workflows, API integration, encrypted response handling, and server-side processing.
- Support a microservice-oriented architecture for API governance, documentation, analytics, and AI-enabled features, with Kubernetes included in the service deployment and orchestration toolset.
- Build and maintain module-federated micro-frontends while coordinating shared contracts and application state across independently deployed surfaces.
- Implement server-side analytics and privacy controls, including consent-aware tracking gates, visitor classification, version filtering, and product engagement metrics.

Junior Web Developer

February 2023 – October 2023

CPSD Technologies Ltd · Dhaka, Bangladesh

- Developed responsive web interfaces using HTML, CSS, and JavaScript, and collaborated with backend developers to integrate APIs and application data into frontend features.
- Prepared technical documentation and interactive presentations for client pitches and project handoffs.

Web Developer (Intern)

August 2022 – January 2023

CPSD Technologies Ltd · Dhaka, Bangladesh

- Built reusable UI components and supported the transition of internal tools to a component-based frontend structure while learning full-stack application workflows.

PROJECTS

Sense & Respond Software LLC

InteractiveDox (Documentation Platform)

Next.js · React 19 · Node/Express · MongoDB · Redis · REST APIs · Microservices · MDX · GitHub App

- Multi-tenant documentation platform served on custom domains, backed by services that ingest and publish content from customer GitHub repositories.
- Built privacy controls end to end across the data model, content service, and server-side reader gate so a declining visitor never receives the tracking script.
- Built server-side analytics with version filtering, engagement metrics, and human-vs-AI-agent traffic classification.

All Things API (ATA): API Governance Suite

React · Vite · Electron · NestJS (Fastify) · MongoDB · Redis · REST APIs · Microservices · Kubernetes

- Multi-application API governance platform delivered as web and Electron applications, with frontend clients consuming backend services through defined API contracts.

- Contributed to NestJS backend services on MongoDB and Redis, including shared response handling, service workflows, and integration points used across the suite.
- Worked across independently deployed applications and service boundaries in a microservice-oriented architecture, supporting scalable orchestration patterns with Kubernetes.

Sniffer: Defect Tracking & Support Platform

React · MUI x-data-grid-pro · Redux Toolkit · NestJS · MongoDB · Socket.IO · REST APIs

- Defect-tracking and support product with real-time updates, API-backed workflows, and large operational datasets.
- Built board and tracker interfaces and integrated them with NestJS services, including real-time Socket.IO updates and backend-driven project data.
- Contributed to the project-onboarding wizard and its backend project-creation flow.

EDUCATION

Master of Business Administration, North South University

2024 – Ongoing

B.Sc. in Computer Science & Engineering, North South University

2019 – 2023 · CGPA: 3.46 / 4.00

ACHIEVEMENTS

- Star Volunteer (2019-2020 & 2020-2021), IEEE NSU Student Branch.
- Best Campus Ambassador (2020), IEEE University of Liberal Arts Bangladesh SB, Conquest'20 Inter-University Game Narrative Design Writing Contest.
